

What went well?

What should we keep doing?
What should we celebrate?
Where did we make progress?

Agricultural Crop
Production

What went poorly?

Where did we have problems?
What was frustrating to us or others?
What held us back?

Rotating crops can help to prevent soil depletion and pest and disease build-up, which can reduce crop yield.

To honour and appreciate all the responsible farmers for their contributions to society, National Farmers' Day is celebrated every year on 23 December.

Agriculture was developed independently in the Far East, probably in China, with rice rather than wheat as the primary crop.

Erosion of soil by heavy rain, floods, insufficient vegetation cover etc., reduces farm productivity.

An issue at the forefront last year was the rising cost of everything.

The most Indian farmers, being poor, use outdated implements and technology, and are not able to afford costly inputs.

Agricultural innovation can help India cut emission, improve energy security and boost farmers' incomes.

Millets, often neglected in favor of mainstream crops, possess exceptional qualities that make them highly suitable for sustainable agriculture and food security.

Agriculture is the backbone of human existence.

Agricultural extension and rural advisory services; from research to action.

What ideas do you have?

What ideas do you have for future work together?
Where do you see opportunities to improve?
What has untapped potential?

How should we take action?

What do you believe we should do next?
What specific things should we change?
What should extend beyond this meeting?
